

MERIDIAN 01

GPS-disciplined clock, 10 MHz reference

Holdover	1e-9 over 4 hours, OCXO warmed
Acquisition	cold 12 min, warm 90 s
Outputs	10 MHz sine, 1 PPS TTL, NMEA over USB
Supply	9-15 V DC, 4.5 W steady, 11 W warming
Antenna	SMA, 3.3 V bias, 25 m RG-174 supplied
Board	100 x 80 mm, four layer, 1.6 mm
Kit contents	board, OCXO, antenna, case files, no enclosure
Assembly	through-hole only; SMD is pre-populated

Revision C - see the changelog on the site for what moved.

This page is a fixture. The clock is not real. The numbers are plausible.
